

EDUCATION

- Pursuing a double major: B.S. in Information Technology & B.S. in Cybersecurity (GPA: 3.7 / 4.0)
- Resident Assistant, 3x Dean's List (Fall 2024, Summer 2025, Spring 2026)
- Relevant Coursework: Database Management II, Network Infrastructure Management, System Design & Analysis, Computer Programming

SKILLS / TECH STACK

Programming Languages: Python, YAML, Java, SQL, TypeScript, JavaScript, HTML5/CSS, C#

Developer Tools: VS Code, GitHub, GitHub Actions, AWS (Glue, S3, Athena, Lambda, Step Functions, CloudFormation, AppFlow), Azure, PostgreSQL, Docker, Supabase, Microsoft Power Automate

Libraries/Frameworks: ReactJS, Vite, Express, NodeJS, FastAPI, boto3, LangChain, Sequelize, Liquibase, Inversify

Practices: CI/CD, ETL Pipeline Development, Clean Architecture, RAG Pipeline Development, Agile/Scrum

SUMMARY

My name is Kymani Jarrett, and I'm a driven software engineer passionate about solving real-world problems through clean, scalable code and thoughtful design.

As a double major in Software Development and Cybersecurity at the University of Cincinnati, I'm committed to building systems that are both technically sound and user-centric. Over the past three years, I've grown from a front-end enthusiast into a full-stack engineer with hands-on experience in cloud data engineering, ETL pipeline development, and enterprise-grade system design.

The things I am most proud of working on:

Entering the cloud data engineering space:

During my internship at The J.M. Smucker Co., I worked within the AWS data engineering ecosystem, building and optimizing ETL pipelines with AWS Glue, managing data workflows in S3, and leveraging Lambda, Step Functions, and Athena to support data infrastructure across a portfolio of iconic consumer brands. To prepare, I built Vigil, an ETL Monitoring & Observability Platform - a React + FastAPI application that connects to AWS Glue via boto3 to track job runs, detect anomalies, and surface pipeline health in real time.

Building scalable enterprise solutions:

At the UC IT Solutions Center, I engineered applications for Fortune 500 companies using ReactJS, Node, and PostgreSQL, accelerating release cycles by 20% and reducing data processing time by 30%.

Outside of Code:

Leadership & Involvement:

As Secretary of the Bearcat Buddies Advisory Council, I identified a core operational gap and built the fix - a full recruitment automation pipeline using Microsoft Power Automate with personalized QR-code attribution, a live Excel quota dashboard, and a documented handoff guide so the system outlasts my tenure.

As Corporate Outreach Chair for ColorStack @ UC and Programming Chair for the United Black Student Association, I bridge tech and community - securing corporate partnerships, laying the foundation for exclusive job

pipelines for members, and producing events like The RoundTable, a curated recruiting dinner connecting UBSA members directly with hiring managers from active pipelines.

RESUME INFO

Resident Assistant

Resident Education & Development (*University of Cincinnati, Ohio*) | August 2026 – Present

- Serve as the primary point of contact and support resource for a floor of 70 residents, conducting consistent check-ins and connecting students to campus resources, averaging 10+ resident referrals per semester to academic, wellness, and counseling services
- Plan and execute 2+ monthly programming initiatives targeting resident wellness, academic success, and community engagement, sustaining over 40% floor participation across events throughout the year
- Respond to and manage student conduct situations, crisis interventions, and facility concerns in accordance with university Housing & Residence Life policy, contributing to a 25% reduction in repeat conduct incidents through proactive community engagement
- Maintain an average 4.5/5.0 resident satisfaction rating across informal evaluations by exercising sound judgment and maintaining resident confidentiality, translating resident needs into actionable reports and prioritizing accessibility, follow-through, and consistent community presence

Cloud Data Engineer

The J.M. Smucker Company (*Orrville, Ohio*) | May - August 2026

- Led the migration of the Sales Marketing & Analytics CloudFormation Templates to GitHub, authoring production-grade deployment workflows to replace the existing CI/CD pipeline, configuring AWS environment secrets & writing Python unit tests validated through e2e testing w/ business users
- Took end-to-end ownership of partner-driven identification integration across a full enterprise data pipeline - updating AppFlows, Glue Table schemas and ETL job logic, with downstream Athena validation confirming accurate data flow through a raw ⇒ curated ⇒ published internal pipeline
- Engineered and maintained CloudFormation scripts using YAML-based configurations to provision and deploy AWS infrastructure as code, including Glue Data Catalog tables and Step Function definitions, reducing manual configuration overhead and improving deployment repeatability across environments
- Authored Athena SQL queries against S3-backed Glue tables to extract and validate business-critical datasets; programmatically accessed S3 buckets via Python and boto3 to support ingestion and transformation workflows within large-scale ETL pipelines spanning Glue, Lambda, Step Functions, and Informatica IICS, while upgrading Glovia integration Lambda runtimes to address AWS EOL policy through cross-team coordination

Full Stack Software Engineer

IT Solutions Center (*University of Cincinnati, Ohio*) | August 2025 – May 2026

- Collaborated with cross-functional teams to design, develop & maintain dynamic full-stack applications for **Fortune 500 companies**, leveraging **ReactJS (Vite)**, **TanStack & Zod** to deliver responsive and user-friendly interfaces
- Engineered and optimized **NodeJS (TypeScript)** backends using **Express**, **PostgreSQL (Sequelize ORM)**, **Inversify dependency injection** and **Liquibase** database migration, improving application performance and security for enterprise clients and reducing data processing time by **30%**

- Engaged in **bi-weekly client meetings** and cross-team technical discussions that **informed key development decisions**, improved stakeholder alignment and showcased staging updates, significantly improving development efficiency and **accelerating release cycles by 20%**
- Implemented Clean Architecture with SOLID principles across production codebases, ensuring long-term scalability and reducing onboarding friction for future contributors through structured technical documentation

Handshake Creator

Handshake (*Cincinnati, Ohio*) | July 2025

- Film high-quality and engaging content for Handshake that follows content guidelines, conducting edits and revisions as necessary.
- Create 3 pieces of content each week from text posts to videos about career topics and the college experience.
- Act as a liaison between Handshake and the university, representing the organization at on-campus events and fostering a sense of community

Administrative & Logistics Associate

Center for Student Involvement (*University of Cincinnati, Ohio*) | April 2024 - August 2025

- Efficiently processed & logged **30+ packages** and mail items weekly, facilitating timely delivery to clubs & staff
- Maintained **100% accuracy** in tracking & inventory of equipment used by **over 100 student organizations** daily
- Assisted with event planning & coordination & provided **exceptional customer service** through professional interactions by phone & in person

Front-End Software Development Intern

Toyz Electronics (*Cincinnati, Ohio*) | January – May 2025

- Designed and implemented a static web application functioning as a dynamic marketplace, showcasing user-generated content from video games to create interactive portfolios tailored for **over 5000 students and professionals** alike, utilizing expertise in ReactJS and C#
- Collaborated with **four renowned universities** to develop an immersive game experience, assisting in building the next-generation version of **Dah-Varsity AI** with Unreal Engine

Technical Product Expert

Intuit TurboTax (*Remote*) | March 2024 – April 2025

- Provided real-time chat & phone support to customers preparing & filing taxes using the TurboTax platform, delivering expert guidance on troubleshooting software navigation & technical cases related to account access, software performance & product issues
- Resolved tickets efficiently in a high-volume, remote environment, while maintaining strict confidentiality and adhering to all data privacy protocols

Customer Service Agent

Ibex (*Kingston, Jamaica*) | June – August 2024

- Delivered exceptional customer service to Amazon customers by resolving issues related to faulty orders and deliveries, including processing refunds, replacements, returns, and retro charges.

- Assisted customers with a wide range of product and account inquiries, including managing Amazon Prime memberships, in-depth app navigation, and delivery-related questions.

Administrative Assistant

Tortuga Caribbean Rum Cakes Ltd. (*Kingston, Jamaica*) | June – August 2021

- Processed payroll information; participated in the process of screening potential employees
- Organized and filed correspondence, memos, and other important documents

PROJECTS

Vigil | *React · Vite · Python · FastAPI · AWS · PostgreSQL*

github.com/kymanirjarrett/vigil | *[user facing url]*

- Built a production-grade ETL observability platform that monitors AWS Glue pipeline health in real-time, connecting directly to the AWS Glue API via boto3 to surface job run history, execution durations, and failure states across a live dashboard
- Engineered a statistical anomaly detection engine that identifies duration spikes and consecutive failure patterns, triggering automated email alerts through SendGrid before failures cascade downstream
- Designed a dark-themed React + Vite dashboard with Recharts visualizations, color-coded health indicators, and per-job run history panels, styled to match the aesthetic of production monitoring tools like Datadog
- Implemented JWT-based authentication, a RESTful FastAPI backend, and a PostgreSQL persistence layer via Supabase to store historical run data for trend analysis across 7-day and 30-day windows
- Deployed to production with a Railway-hosted backend and Vercel-hosted frontend; documented with a full open-source README including architecture diagrams, setup instructions, and environment variable references

Clausify | *Next.js · TypeScript · Python · FastAPI · OpenAI · PostgreSQL*

github.com/kymanirjarrett/clausify | *[user facing url]*

- Built an AI-powered SaaS platform that allows small businesses, freelancers, and founders to upload contracts (NDAs, service agreements, employment contracts) and receive instant AI analysis, identifying risky clauses, unfavorable terms, and deviation from industry-standard conventions
- Engineered a RAG (Retrieval-Augmented Generation) pipeline using LangChain and Groq AI to process multi-page contracts with semantic understanding, enabling risk scoring at the clause level based on industry, company size, and legal context
- Built a pgvector-backed semantic search layer over a database of legal clauses, enabling real-time comparison of uploaded contract terms against a library of standard language
- Implemented multi-version diff tracking with AI-generated summaries highlighting what changed between contract iterations and why it matters for negotiation
- Architected a full-stack system with a Next.js + shadcn/ui frontend, FastAPI backend, Supabase PostgreSQL database, and AWS S3 for document storage, deployed across Vercel and Railway

LEADERSHIP, CLUBS & VOLUNTEERING

- Programming Chair | United Black Student Association
 - Lead all programming and event strategy for UBSA, designing and executing a semester-wide calendar of cultural, professional, and community-building events that serve as a primary resource for Black students on campus following the closure of UC's African American Cultural and Resource Center
 - Conceptualize and produce 4+ signature events per semester spanning professional development, cultural celebration, and community engagement - sustaining 40+ member attendance per event through intentional programming that reflects the needs of the membership
 - Spearhead "The Roundtable," a curated recruiting dinner pairing UBSA members directly with recruiters and hiring managers from companies with active pipelines - structured around guided conversation rounds with recruiter rotations and a corporate table sponsorship model to offset event costs
 - Manage end-to-end event logistics including venue coordination, vendor outreach, budget tracking, and post-event reporting, executing programming within budget across all events throughout the academic year
 - Collaborate cross-functionally with the Corporate Outreach Chair and other e-board members to align programming with active corporate partnerships, converting sponsorship relationships into tangible career opportunities for chapter members

- Corporate Outreach Chair | ColorStack at the University of Cincinnati
 - Lead all corporate partnership efforts for ColorStack @ UC, prospecting and maintaining relationships with local and national tech companies to secure event sponsorships, funding, and exclusive recruiting pipelines for chapter members
 - Coordinate and execute 2+ technical workshops per semester - including resume reviews, mock interviews, and engineering deep dives - in partnership with recruiters and engineers from sponsor companies, sustaining 30+ member attendance per event
 - Manage a structured corporate contacts database of 20+ active employer relationships, delivering post-event impact reports and follow-up correspondence to maintain partner engagement across the academic year
 - Source and distribute 10+ exclusive internship and full-time opportunities per semester directly from corporate partners to chapter members, creating a job pipeline that meaningfully supplements standard career fair recruiting

- Secretary | Bearcat Buddies Advisory Council
 - Served as the official record-keeper for the Advisory Council - maintaining meeting minutes, organizational correspondence, and program documentation across each semester to ensure operational continuity and institutional memory for the council
 - Architected an end-to-end recruitment automation system replacing the program's manual paper-based process to automatically attribute each student submission to the recruiting member and send an automated welcome email to the prospective student, eliminating self-reporting and ensuring accountability as the size of the program scales
 - Built a council recruitment dashboard with a structured Responses Log and a live Council Dashboard using COUNTIF-based quota tracking, giving program leadership instant visibility into each Ambassador's and Lead Tutor's recruitment progress across the semester
 - Authored a Semester Reset & Maintenance Guide documenting the full system architecture, form setup, flow configuration, and handoff steps, ensuring operational continuity for future e-board members without institutional knowledge loss

- Bearcat Buddies Ambassador
 - Serve as a liaison between the Bearcat Buddies program and university partners, fostering positive relationships by representing at campus events & outreach activities
 - Assisted in recruiting, onboarding, and training new volunteers, helping to expand the program's reach and impact in local schools
- Caribbean Coalition Secretary
 - Maintain all organizational records, meeting minutes & correspondence, and collaborate with other executive board members on event planning & coordination
 - Coordinated meeting logistics, including scheduling, agenda preparation, and distribution of materials, improving meeting efficiency and participation
- Bearcat Buddies Tutor
 - Provided one-on-one and small group academic tutoring to K-12 students in Cincinnati Public Schools, reinforcing foundational concepts in core subject areas and supporting student learning outcomes
 - Maintained consistent communication with program coordinators and school partners to align tutoring sessions with student academic needs and semester timelines
- Resident Education & Development – Residence Hall Association Representative
- Dahyabhai Foundation Volunteer (Bengals Game Food Stand)
- UC Esports – Call of Duty
- Video Production Club (Lead Editor)
- University of Cincinnati African Student Association (UCASA)
- IT Proud
- Black Arts Collaborative – Poetry & Music
- National Organization for Black Chemists & Chemical Engineers (NOBCCHE)
- American Society of Mechanical Engineers (ASME)

AWARDS

- Dean's List: Fall 2024, Summer 2025, Spring 2026
- International Outreach Scholarship
- ISSA Cybersecurity Scholarship
