Education

University of Cincinnati

Bachelor of Science in Information Technology & Cybersecurity

Expected Graduation: May 2028

Cincinnati, Ohio

- **Academia:** 3x Dean's List Recipient | **GPA: 3.7/4.0**
- **Leadership:** Resident Assistant (Resident Ed & Dev), Corporate Outreach Chair (ColorStack @ UC), Secretary (Bearcat Buddies Advisory Council), Programming Chair (United Black Student Association)

Work Experience

Cloud Data Engineer

May – August 2026

The J.M. Smucker Company

Orrville, Ohio

- Led the migration of the **Sales Marketing & Analytics CloudFormation Templates** to GitHub, authoring **production-grade deployment workflows** to replace the existing **CI/CD pipeline**, configuring **AWS environment secrets** & writing **Python unit tests** validated through e2e testing w/ business users
- Took **end-to-end ownership** of **partner-driven identification integration** across a full enterprise data pipeline – updating **AppFlows**, **Glue Table schemas** and **ETL job logic**, with **downstream Athena validation** confirming accurate data flow through a raw ⇒ curated ⇒ published internal pipeline
- Engineered and maintained **CloudFormation scripts** using **YAML-based configurations** to provision and deploy **AWS infrastructure as code**, supporting **large-scale ETL pipelines** and **Informatica IICS**, while upgrading **Glovvia integration Lambda runtimes** to address AWS EOL policy through cross-team coordination

Full Stack Software Engineer

August 2025 – May 2026

UC IT Solutions Center

Cincinnati, Ohio

- Collaborated with cross-functional teams to design, develop, maintain dynamic full-stack applications for **Fortune 500 companies**, leveraging **ReactJS (Vite)**, **TanStack & Zod** to deliver responsive and user-friendly interfaces
- Engineered and optimized **NodeJS (TypeScript)** backend using **Express**, **PostgreSQL (Sequelize ORM)**, **Inversify dependency injection** and **Liquibase database migration**, improving application performance and security for enterprise clients, reducing data processing time by **30%**
- Engaged in **bi-weekly client meetings** and cross-team technical discussions that informed **key development decisions**, improved stakeholder alignment and showcased staging updates, significantly improving development efficiency and **accelerating release cycles by 20%**

Projects

Vigil | *Website* | *Source Code*

React | **FastAPI** | **AWS**

- Built a **production-grade ETL observability platform** monitoring **AWS Glue** pipeline health in real time, surfacing job run history, execution durations, and failure states across a **live dashboard** with statistical anomaly detection and **automated SendGrid alerts**
- Implemented a **RESTful FastAPI** backend with **JWT authentication**, **PostgreSQL** persistence via Supabase for 7-30 day trend analysis, and **boto3** AWS Glue API integration – deployed across **Vercel** and **Railway**

Clausify | *Source Code*

Next.js | **RAG** | **PostgreSQL**

- Built an **AI-powered legal SaaS platform** enabling small businesses and founders to upload contracts and receive **instant clause-level risk scoring** against industry-standard benchmarks using a **RAG pipeline** with **LangChain**
- Engineered a **pgvector** semantic search layer over a legal clause database with **multi-version diff tracking** and AI-generated negotiation summaries – architected on a **Next.js** frontend, **FastAPI** backend, and **AWS S3** document storage

Technical Skills

Languages: Python, YAML, Java, SQL, TypeScript, JavaScript, HTML5/CSS, C#

Developer Tools: AWS Suite (Glue, S3, EC2, Athena, Lambda, Step Functions, CloudFormation, AppFlow), PostgreSQL, Docker, Supabase, GitHub, Azure

Libraries/Frameworks: ReactJS, Vite, Express, NodeJS, FastAPI, boto3, LangChain, Sequelize, Liquibase, Inversify
